

CHAKIT SHARMA

Full-Stack Developer · MERN Stack · AI Integration · 1+ Year of Experience
+91-9411952472 · chakitsharma7@gmail.com · LinkedIn · GitHub · Portfolio

PROFESSIONAL SUMMARY

Results-driven Full-Stack Engineer (B.Tech 2026, CGPA 7.8) with hands-on experience building scalable MERN applications, integrating AI APIs, and designing RESTful systems.

EXPERIENCE

Full Stack Developer — CWL Technology Private Limited

Feb 2026 – July 2026

Noida · Next.js · TailwindCSS · REST APIs · MongoDB · WebSocket · AWS S3

- Developed and shipped Kiddocracy end-to-end, from initial architecture and build through to production deployment; the platform is currently live and serving users.
- Built and integrated REST APIs for the YBF project and optimized front-end delivery, improving the Google PageSpeed performance score from 46 to 80.
- Worked as backend developer alongside a Flutter engineer to design and build REST APIs (Node.js, MongoDB) powering a rewards-based mobile application; documented all endpoints with Postman collections and managed version control via GitHub.
- Developed and maintained responsive web interfaces using Next.js, contributing to production-grade features with a focus on performance and code reusability.

Frontend Developer Intern — iCtrlBiz Consulting Pvt Ltd

Jun 2025 – Dec 2025

Remote · React.js · HTML · CSS · JavaScript · REST APIs · WebSocket

- Architected and delivered responsive, production-grade web pages using React.js, translating design specifications into reusable component libraries that improved UI maintainability and performance.
- Contributed to multiple small-scale production projects, including a Project Management System (PMS) managing the full project lifecycle from initiation through client delivery, with role-based access for Super Admin, Sub Admin, Managers, Employees, and Clients.
- Implemented a tree-structured task assignment workflow enabling projects to be broken down and assigned to employees, with each employee able to update task progress independently in real time.
- Integrated WebSocket-based live chat into the PMS, allowing admins, managers, employees, and clients to communicate, assign tasks, and share requirements in real time.

PROJECTS

Expense Tracker with AI Insights | Full-Stack MERN · Firebase · Gemini API · Recharts

- Designed and built a scalable full-stack web application enabling users to track, categorize, and analyse expenses with AI-powered financial insights via the Gemini API.
- Implemented interactive dashboards with real-time data visualization using Recharts; added PDF/Excel report export functionality to improve operational outcomes for end-users.

Eco-Pilot — AI-Powered Carbon Footprint Tracker | Full-Stack MERN · AI Integration · MongoDB

- Designed and built a full-stack carbon footprint tracking application that leverages AI to analyse user lifestyle inputs and generate personalised emission reduction recommendations.
- Architected scalable RESTful APIs using Node.js and Express to handle carbon data ingestion, processing, and retrieval, ensuring platform stability and data integrity across concurrent users.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java

Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS, Recharts

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication

Databases: MongoDB, MySQL, Firebase

AI / APIs: Gemini API, Twilio, Stripe, REST API Integration

DevOps & Tools: Git, Vercel, Render, AWS Elastic Beanstalk, Postman, AWS S3 bucket

ACHIEVEMENTS & RECOGNITION

- Solved 200+ Data Structures & Algorithms problems on LeetCode — strong analytical and problem-solving foundation for engineering roles.
- 5-Star Java rating on HackerRank; solved 500+ rated problems on CodeChef, demonstrating consistent self-motivation and technical depth.
- Coding Profiles: LeetCode · HackerRank

EDUCATION

B.Tech — Computer Science Engineering

2022 – 2026

IMS Engineering College, Ghaziabad · CGPA: 7.8 · No active backlogs
